TODAY. 89c.

HARVARD DOES FOUR MILES

Varsity Eight Covered Course in 21:53—Wray Says They Took It Easy and Finished in Good Shape.

Red Top June 16.—Under conditions of weather and water decidedly favorable the Harvard varsity eight had its first time row over the full four-mile course tonight, covering the distance in 21:53. At the start the water was smooth for the first two miles, but roughened up a trifle for the last two. When the eight left the starting mark there was an ebb tide, but at the navy yard they struck the flood, which was with them until the finish. At the mile mark the freshman eight picked up the varsity and rowed to the three-mile mark, being beaten by a length and a half. The stroke was started at 23 and gradually raised until a 34 was reached for the last half-mile. All the men finished in good shape and Coach Wray stated that they didn't extend themselves at all. The four were left to their own devices and paddled up and down stream for about four miles. KENNEDY SHIFTS

YALE VARSITY FOUR
Cales, Ferry, June 16.—A change was made in the first varsity four of the Yale crews tonight, after which they were taken down to the three-mile mark by Coach Kennedy. As boated tonight, Elwell was at bow; Howe, No. 2; Maitland, No. 3; and Appleton, stroke, with Wood as coxswain. The change moved Howe from stroke to No. 2 and Appleton from the second four to stroke. The freshmen four rowed down to the two-mile mark and back. Both eights went out together, down the course at slow stroke until the two and a half mile mark was reached when the freshmen stopped and returned. The senior eight continued down to the bridge, where for the last half-mile the stroke was raised to 39 for a sprint. The return was made in easy stretches. Among the visitors at quarters today was Captain Cutler of the Harvard varsity eight, who talked over matters with Captain Frost of the Yale varsity.

POWER LAUNCH BURNED.

Harold Vanderbilt's Vagrant Destroyed at Red Top.

There was a lot of excitement at the wharf at Red Top Friday afternoon at 2 o'clock, and for a while it looked as though the launch John Harvard would be destroyed. Harold Vanderbilt's 20 foot power launch Vagrant was tied alongside the Harvard, with the owner on board, when a flare back ignited the woodwork.

The fire singed Mr. Vanderbilt's hair and burned him about the head quite severely. Jack Mahan and Jack McCusker, employed at the Harvard training camp, ran down to the wharf and out the blazing Vagrant and the launch ran against the light owned by the government and set fire to that. It then drifted farther down the river and finally sank before the steam tug had a chance to explode.

The power launch is used as a tender for Mr. Vanderbilt's yacht Vagrant and was a handsome and expensive craft. She had just arrived Friday.

The loss will be in the neighborhood of \$2,500.

H. M. LEONARD

MADE PRESIDENT

Chosen by Stationary Engineers at Annual Meeting—Delegates Elected.

President Levi Saunders completed a successful term as presiding officer of the Norwich Stationary Engineers' association, No. 6, on Friday evening, when the association held its regular meeting in the Bill block and elected its officers for the next year as follows:

President, Harry M. Leonard; vice president, Samuel Austin; recording secretary, H. R. Taylor; financial secretary, Peter Stefferson; treasurer, George K. Sanders; conductor, Carl Eccleston; doorkeeper, John O'Brien; trustees, G. K. Sanders, Levi Sanders and John D. Carpenter. J. Hanigan was elected delegate and Carl Eccleston alternate to the national convention which meets in Cincinnati in September. The newly elected president has been vice president in the past year and one of the active members of the organization who is well qualified to take a place as its head for the coming twelve months. The new officers were installed June 30. Because of the state convention next Friday it was decided to omit the regular meeting of the local that night as so many of the officers will be at the state convention.

\$100 Reward \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh of the Bladder. It is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, it requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.
